[SACK THEM ALL](#)

A call for freedom from the two-party false paradigm.

The 2022 Election represents the essential political conflict of our time — one between the corporate oligarchy and the beleaguered working classes.

A week remains until Australians head to the polls, and today, demonstrators took to the streets to let the establishment know what they think of them. A collective voice of rejection to their agenda.

Australians will not forget the last two years.
