Stop Agenda 2030

UN “Sustainability” Schemes Behind War on Farmers & Food

The United Nations, Deep State, and globalist elites do not just aspire to form a one-world government. They seek to take full control of the planet, including the economy, our country, our lives, and our children.

This master plan for technocratic and totalitarian control is found in the UN’s Agenda 21 and the newer and even more draconian Agenda 2030. The aspects of life and society they seek to hijack are euphemistically outlined as “Sustainable Development Goals.” The WEF’s “Great Reset” and the UN’s “Build Back Better” plan go hand-in-hand with Agendas 21 and 2030.

Originally, those pushing for Agendas 21/2030 used climate change as the impetus for advancing those plans. With the onset of the COVID-19 pandemic, the Deep State found another excuse for executing their master plan for humanity.

Agenda 2030 is already being implemented in our country and world. For example, the global elites have declared war on farmers in an effort to control the global food supply. Environmental, Social and Governance (ESG) standards, which pressure individuals and companies into adopting leftist policies, are being implemented. And carbon-capture pipelines, funded by some of the same groups promoting ESG, threaten Americans’ property rights.

Although Agenda 2030 is presented as being “nonbinding,” it is actually a form of “soft law.” This means that government entities often choose, or are pressured, to adopt it, thus making it legally binding.

Take Action

It is imperative that JBS members and supporters work together to stop and roll back Agenda 2030 and the Great Reset. This challenge is vast and therefore needs dedicated and perseverant activism. Ultimately, we must achieve full United States withdrawal from the United Nations and all its associated entities, but there are many other actions you can take. Here is what you can do right away:

- If you haven't already, **join The John Birch Society** and become part of a local chapter to learn more about the problem and coordinate effective action with other members.
- **Organize an ad hoc committee** to rollback Agenda 2030 initiatives in your state or community (Formation Report).
- **Schedule a speaking event** featuring Alex Newman and/or Tom DeWeese, our experts on the Great Reset and Agenda 2030.
- Distribute and share the materials listed below — including the products, articles, videos, and legislative alerts — with your fellow citizens to create awareness.

You can take immediate action on the following *federal-level actions*:

- **Contact your U.S. representative and senators and urge them to get the U.S. out of the United Nations by passing the American Sovereignty Restoration Act.** This is the single most important action for stopping Agenda 2030 (a UN program) and the Great Reset from being implemented in the U.S. To easily contact Congress, use JBS's legislative alert supporting U.S. withdrawal from the UN.
- Also urge Congress to prevent any implementation of ESG at the federal level. This includes administrative rules from agencies such as the Securities and Exchange Commission.

Finally, you can take immediate action on the following actions on the *state and local levels*:

- **Stop your local government from implementing Agenda 2030.** Check whether your county, city, town, or village is a member of "ICLEI — Local Governments for Sustainability," an organization working to implement Agenda 2030 at the local level. If it is listed, work with your chapter leader and JBS field coordinator to ramp up education efforts to officially withdraw your local government's membership in ICLEI. **Even if your local government isn't an official member**, it may still have in place an active sustainable development plan or sustainability coordinator, and be working with other redevelopment agencies advancing the 2030 Agenda. Finding this out is crucial, and then stopping it is imperative.
- **Contact your state legislators and urge them to enact legislation blocking the implementation of Agenda 2030 and the Great Reset.** They can do this by **1)** enacting legislation similar to Alabama's SB 477 (2012) expressly prohibiting governmental involvement in any Great Reset or UN Agenda 21/2030 schemes; **2)** nullifying unconstitutional federal actions that advance these diabolical schemes, including in the agriculture and energy spheres; and **3)** enacting legislation preventing foreigners and out-of-state elites from purchasing vast amounts of farmland. Our "Contact Elected Officials" tool is an easy way to find out who your representatives are and how to contact them. Our alerts include talking points for phone calls.

- **Urge both your state *and* local governments to 1)** boycott any businesses or organizations that have implemented ESG standards, as West Virginia and other states have already done, **2)** protect single-family and low-density zoning rules (e.g. prevent the abolition of such zoning rules, and prevent BlackRock and other globalist investors from purchasing single-family homes), and **3)** fully protect individuals' property rights, especially from eminent domain.
- Attend meetings where legislators and local officials will be available and make your voice heard. When possible, distribute our Agenda 2030 and Great Reset materials (listed below) to them.
